

Why do we have to eat insects ?

Don't look really attractive, but really good for us in fact...

Insects exceptional nutritional value

Really low environmental impact on Earth

- ▶ In 1000L of water given:
 - ▶ Beef: 16g of proteins
 - ▶ Cricket: 185 g of proteins
- ▶ Natural and biological breeding of insects
- ▶ Culture without allergens and contaminants

Which species do we breed in France, especially in our region ?

Mealworms
(*Tenebrio molitor*)

House Cricket
(*Sigillatus*)

Micronutris, a local insects producer

- ▶ Based on St-Orens
- ▶ Created in 2011
- ▶ Certified by ISO 22000 and the COP21
- ▶ Nationally and internationally known
- ▶ Created two product lines: Getsharp and Microdélices

I. Getsharp: sports nutrition product line

A line for people who want to eat insects while doing exercise

II. Microdélices: a gourmet line

Those recipes are for people who have a delicate palate
